

The Federal Communications Commission

Dear The Federal Communications Commission,

Don't sell out to business interest on this proposal to have a flat fee for contributions are made to the Universal Service Fund.

Who ever thought of this scheme... Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is highway robbery!

Why should I pay for more for phone usage benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Sincerely,

Daniel Millet
